

## Local Content Policy

At **Alberg**, we hold the Nigerian Local Content Policy paramount in our operations. Being a 100% Nigerian owned company and having largely benefitted as a company from the policy, **Alberg** considers the policy as an important feature of all its activities.

All FEED and detailed engineering design for all projects executed by **Alberg** are domiciled in **Alberg's** head quarters in Port Harcourt, Nigeria. Additionally, all design jobs are executed 100% by competent Nigerians.

Relevant trainings for our Nigerian engineers & technicians are scheduled regularly and as the Project demands to equip them with the latest industry technologies. In the event Foreign Expatriates are engaged due to lack of highly skilled know-how in-country, a Nigerian under-study would be assigned on the job in order to facilitate technology / know-how transfer.

All procurement activities are coordinated from our offices in Nigeria and materials used in our projects are sourced from Nigeria and Nigerian bases suppliers. Only items that are not available locally are sourced from outside the country. Fabrication works are executed 100% in Nigeria.

A handwritten signature in blue ink, appearing to read 'Alberg', positioned above a horizontal line.
